LAB ITEM #:

The submitted evidence will be examined and analyzed with established laboratory sampling plans and capabilities, utilizing validated methods and instrumentation. The laboratory reserves the right to outsource testing to external reference labs if it directly affects the final interpretation of the case. Examples of this may be based on requests from the submitting agency, case history, and internal testing results. Forensic reports are mandated by accreditation requirements found in ISO/IEC 17025:2017 to contain specific content. When agreed with the customer, accreditation requirements allow for the issuance of simplified reports. Simplified reports will not result in the reduction of information currently provided. FSD seeks to pursue simplified reporting and requests acceptance from the requestor. Agreement to receive simplified reports will mean that the information found on DOJ FSD website under "Simplified Reports" will be retained and can be provided upon request but will not be routinely provided on all lab reports.
